## 1.0 Executive Summary

Bio-Care provides environmental solutions for the food services manager such as High pressure Vacuum Service, High pressure water jetting service, Closed circuit television for pipes inspections, Electro-Mechanical or Mini-jetting service, and Bio-Care portable grease traps and by using EQUIP ERP system, admin can enter necessary lead details, set the schedule of the appointment while at the same time a team of worker receives the details of the work via an app and starts working on the tasks.

The following FRD outlines the following features for Bio-Care project:

**a) CRM**

Bio-Care can enter the contact details, creating new leads and convert it to opportunities. Using CRM, Bio-Care is able organize sales and customer data into manageable chunks that can be used to inform all of the other data that is necessary for decision making.

**b) Booking System**

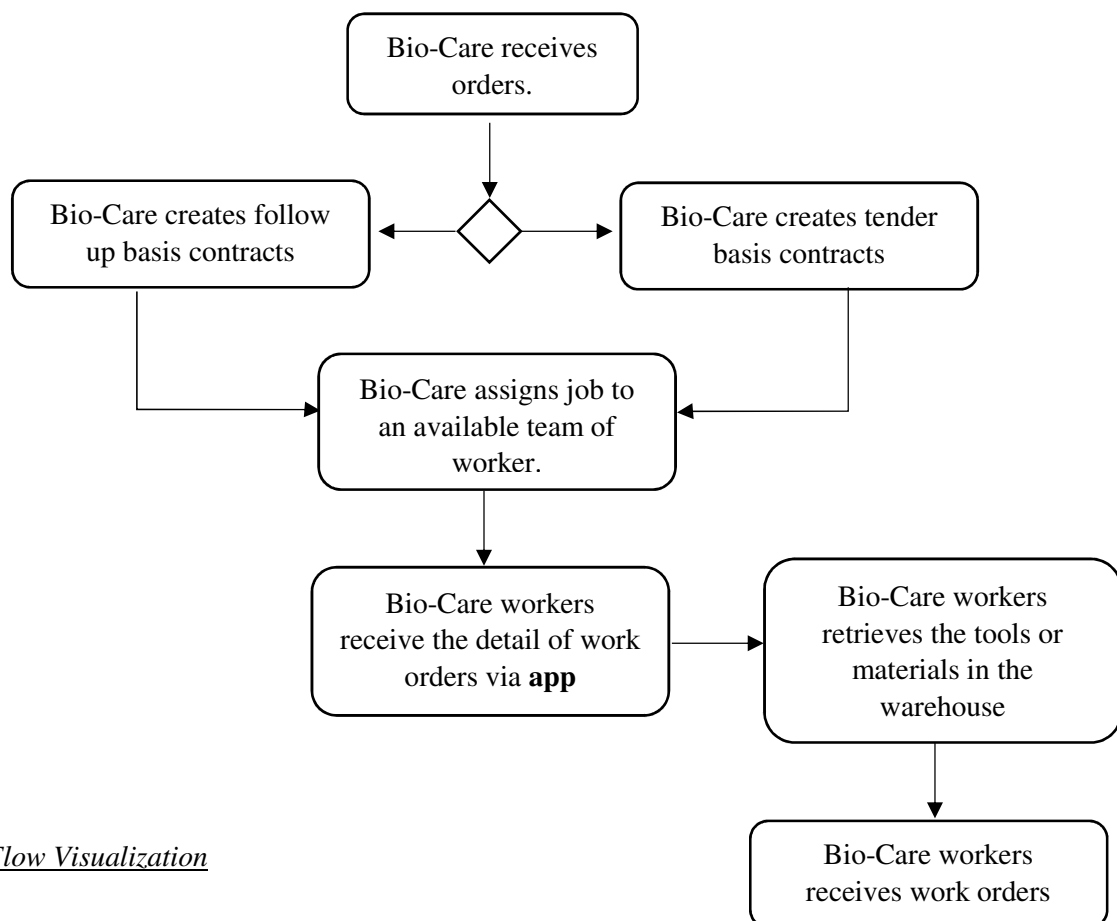

Bio-Care can create bookings based on tender or follow-up basis contracts. Bio-Care assigns the job to a team of worker that is available and finally, the cost of the contract will be entered after the job is done.

**c) Bio-Care App**

By using the Bio-Care app, team of workers will receive the detail of the work, start the timer while GPS is being activated, enter the material and tools used in the process, and remarks.

**d) Warehouse Management**

Centralized management that supports day to day operations in a warehouse. Bio-Care can track the inventory level of each item, stock location, stock in and stock out process between the vehicle and warehouse.

Booking Flow Visualization

## 2.0 Features

### 2.1 CRM

#### 2.1.1 Customer Management

Objective	Allow users to manage customer database, track past sales and assign tags for classification.
Features	<ol style="list-style-type: none"><li>1. Create, update and delete:</li><li>2. Customers record</li><li>3. Contact persons</li><li>4.
